Water Product Compatibility Sheet.

The delivery of live microbial strains to the bird is essential to the development of a healthy gut microbiota. To ensure compatibility and viability, ARM & HAMMER's proprietary *Bacillus* and *Lactobacillus* strains were tested against common drinking water treatments to assess live bacteria components at various concentrations.

PRODUCT	CONCENTRATION RANGE	BACILLUS	LACTOBACILLUS
Pro-Oxine	0 – 6 ppm	✓	Viable up to 3 ppm
Orego-Stim®	0 – 6 oz/100 gal	✓	✓
AniPrin	0 – 8 oz/1 gal	✓	Viable, but below guarantee after 1 hour
Cid Clean	0 – 100 ppm	✓	Viable up to 50 ppm
Copper Sulfate	0 – 16 oz/1 gal	✓	Not viable above 6 oz/gal
Free Chlorine	0 – 6 ppm	✓	✓

NOTE: Check marks (✓) indicate viability of Bacillus strains throughout tested concentration range.

A balanced gut microbiota helps prepare birds for health challenges that contribute to lost performance potential. A healthy gut helps promote efficient digestion and nutrient absorption to improve bird performance, even during periods of stress.

Only ARM & HAMMER™ can deliver live microbial strains targeted to your specific challenges. ARM & HAMMER's continuous technical service and laboratory support helps ensure maximum efficacy of the products in your system.
