

FEEDING CELMANAX IN MILK AND MILK REPLACER

WHY IT MATTERS AND HOW TO DO IT

FEEDING CELMANAX™ TO CALVES IN MILK REPLACER:

Promotes positive performance

Aids in calf health

Can help reduce incidence of scours

For the best performance, mix and feed the proper dose of CELMANAX to your calves every day.

HOW TO FEED CELMANAX IN MILK AND MILK REPLACER

1

Feed the right amount. Follow these feeding rates for CELMANAX Liquid and/or SCP to ensure calves get the right amount for optimal health and performance. CELMANAX can be fed in one feeding or spread out over multiple feedings.

	RATE (mL)*	RATE (oz.)*
CELMANAX Liquid	8 mL/head/day	0.3 ounces/head/day
CELMANAX SCP	1 g/head/day	0.04 ounces/head/day

*Under conditions of risk, dosage may be increased to 2x normal

2

Thoroughly mix CELMANAX into the milk. Using milk or milk replacer at a feeding temperature of 105° F (+/-2), add CELMANAX and mix thoroughly to ensure consistent delivery to each calf.

3

Feed CELMANAX every day. Continue feeding CELMANAX daily, even when calves are healthy. Feeding CELMANAX in calf starter and grower diets helps maintain performance and health both prior to and following weaning.

With CELMANAX, your calves get the benefits of multiple feed additives in one high-quality formula when mixed and fed using recommended procedures.

ANIMALS FIRST.
PRODUCTIVITY ALWAYS.
