CERTILLUS™ Prime WS

CERTILLUS™ Prime WS consists of scientifically selected strains of lactic acid bacteria to enhance the silage fermentation and *Bacillus subtilis* to control native clostridia in haylage, corn silage, and sorghum silage.

Ingredients

Active Bacteria: Dried *Bacillus subtilis* fermentation product, dried *Lactobacillus plantarum* fermentation product, dried *Pediococcus acidilactici* fermentation product, dried *Pediococcus pentosaceus* fermentation product, dried *Streptococcus faecium* fermentation product, dried *Aspergillus niger* fermentation extract, and dried *Bacillus subtilis* fermentation extract.

Inert Carriers: Maltodextrin, sodium bicarbonate, sucrose, sodium silico aluminate, sodium thiosulfate and artificial color.

Guaranteed Analysis

Total Bacteria: 9.1×10^{10} cfu/gram

Toxicity

None. The bacteria in this product are not genetically modified and are Generally Recognized as Safe (GRAS).

Application Rates

CERTILLUS Prime WS inoculates haylage, corn silage, or sorghum silage at 200,000 cfu/gram of crop. Scoop (enclosed in jar) holds 50 grams and treats 25 tons of silage.

Packaging

Available in 500- and 1,000-gram jars.

Storage

Store in a cool, dry area. For maximum shelf-life store in a refrigerator or freezer.

Shelf Life

When frozen, use within 18 months from date of manufacture.
