

#ScienceHearted

# Imagine the perfect yeast culture.

## MILK

What if you could maintain consistent milk production and quality, even during heat stress?

## WEIGHT

What if you could consistently meet target weight goals?

## SOLUTION

What if there was one product in multiple concentrations to meet your specific needs?

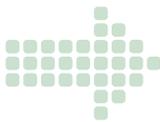

**A-MAX™**

### A-MAX IS THE ANSWER.

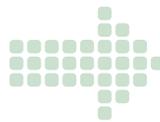

Produced with a proven yeast strain of *Saccharomyces cerevisiae*, A-MAX™ helps prepare animals for the demands of growth, production and maintenance. A-MAX offers you a reliable, quality yeast culture to incorporate into animals' diets to meet your specific needs.

GROWTH

PRODUCTION

MAINTENANCE

### IMAGINE COMBINING THE BENEFITS OF A-MAX WITH IMMUNE SYSTEM SUPPORT.

**CELMANAX™**

### CELMANAX DELIVERS BOTH.

With a unique blend of enzymatically hydrolyzed yeast and Refined Functional Carbohydrates™ (RFCs™), CELMANAX™ offers the production efficiency and productivity benefits of A-MAX along with a multi-functional approach to promoting immune health and performance consistency.

RFCs

Only CELMANAX is available in three formulations, giving you the flexibility to include it in rations in the way that best fits your needs and facilities.

## YEAST FUNCTIONALITY COMPARISON YEAST PRODUCTS — WHAT'S THE DIFFERENCE?

PRODUCT	Mycotoxin Binding	Immune Modulation	Anti-Bacteria Adhesion	Anti-Protozoa <sup>1</sup>	Nutrient Digestibility
CELMANAX™ (Enzymatically Hydrolyzed Yeast)	+++	+	+++	++	+
A-MAX™ (Yeast Culture)					+
Mechanically/Chemically Hydrolyzed Yeast Cell Wall	+	+	+		
Yeast Culture					+
Live Yeast				+	+
Brewers Yeast					

1 CELMANAX can interfere with protozoal (Crypto and *Eimeria*) attachment to the intestine; live yeast is a predator of protozoa.  
Note: The number of plus signs (+) indicates degree of functionality.

No matter the needs of your operation, ARM & HAMMER™ offers the right product for you as a part of our trusted family of brands.
